**P**reah Monivong National Park, known as Bokor National Park, was established by Royal Decree on 01 November 1993 and covers an area of 140,000 hectares (1,400 square kilometers) that span three southern provinces: Kampot, Kompong Speu and Preah Sihanouk.

The area forms part of the Elephant Mountains, which are contiguous with the Cardamom Mountain range to the northeast. The southern boundary of the Park is located less than one kilometer from the coastline of the Gulf of Thailand. The northern boundary forms a seven kilometer link to Kiririom National Park separated only by the National Highway. It is 1,075-metre high above sea level and about 11 kilometres from Kampot town to the foothill and 32 kilometres from the foothill to the cloudy peak.

The Park was first accessed in 1916 and developed later as a famous altitude resort during the regime of the French Protectorate and Prince Norodom Sihanouk in the 1960s. It was abandoned during the Khmer Rouge regime in the 1970s but it served as a strategic base for Vietnamese and Khmer Rouge forces during most of the last few decades.

Bokor National Park is an ecological jewel, rich in unique and endangered wildlife and plants. The range of natural habitats found within Bokor support a number of important mammal species including tigers, leopards, Asian elephants, sun bears, and gibbons, etc. A total of 223 bird species have been recorded in the park, six of which are globally significant, 13 are regionally significant, and 12 have never been seen elsewhere before. Therefore, the park was listed as one of Cambodia's two ASEAN Heritage Parks in 2004.

The government granted the Sokha Hotels a 99-year lease for development at the Bokor hill station in January 2008.

Sokha Co., Ltd has played significant role in developing and conserving the national park to maintain ecosystems and natural habitats as a fundamental requirement for the conservation of biological, diversity, and wilderness that are of scenic, cultural, educational, research, recreational and tourism values.

Thansur Bokor Highland Resort, a branch of Sokha Hotels has employed a hundred of security officers working with rangers from Department of Environment, Kampot, to patrol the park and crack down on illegal logging and trapping. Recently, the resort's security officers and rangers went to jungle and destroyed hundreds traps and confiscated wild animals from the trappers in order to release into the jungle. They had also made lots of effort to crack down on illegal logging.

To increase a variety of species in the park, Chairman of Sokha Co., Ltd, Neak Oknha Sok Kong has released thousands of fresh-water fish in the mountain lake and turtles on the mountain.

# THE RETURN OF WATER FESTIVAL TO PHNOM PENH TO ATTRACT LOCAL AND FOREIGN VISITORS

**W**ater Festival is the largest annual festival in the Southeast Asian nation. In Cambodia, the festival is usually celebrated for three days from the 14th and 15th of the waxing moon to the 1st of the waning moon of the month of Kadek based on the lunar system. The ceremony attracts more international tourists and million Cambodians, especially those from rural areas, to Phnom Penh, the capital city of Cambodia, to enjoy the regatta. Cambodia called off the water festival for three consecutive years because of devastating flood in 2011 and 2013, and the mourning for King-Father Samdech Preah Norodom Sihanouk in 2012.

In this year, the National Committee for Organizing National and International Festival has announced the return of water festival celebration on November 5, 6, and 7, 2014 in front of the Royal Palace in Phnom Penh. The Royal Palace Minister Kong Sam Ol said that about 397 boats will join the races, which are usually held on the river in front of the Royal Palace. The festival marks a change in the flow of the Tonlé Sap. In the rainy season, the water of the Mékong River forces the Tonlé Sap to reverse its current and to flow up to the Tonlé Sap Lake. As the water of the Mékong River begins to subside, the swollen Tonlé Sap Lake flows back to the Mékong River through the Tonlé Sap and empties into the sea, which leaves behind vast quantities of fish. indeed, is a remarkable phenomenon of the Tonlé Sap. This, indeed, is a remarkable phenomenon of the Tonlé Sap.

The water festival is celebrated every year to honor the victory of Cambodian Naval forces over CHAMPA in the reign of King JayavarmanVII, during Angkor period of the 12th century. The war victory (1177-1181 AD) liberated Cambodia and was inscribed on the bas-relief of the Bayon Temple and the Banteay Chhmar Temple. On the base-relief there are images of the navy with Preah Bath Jayavarman VII bravely wielding a fighting stick and bow on the royal barge. On the other hand, following the tradition of Brahmanism the water festival is celebrated to express profound thanks to the Gods of Water (Mekong River and Tonle Sap) and Earth for providing the livelihood (bountiful harvest of rice and fish) and welfare for the Cambodian people.

# CELEBRATING THE 61<sup>ST</sup> CAMBODIAN INDEPENDENCE DAY

Cambodia is going to celebrate Independence Day on 9 November 2014 following the water festival. This year marks Cambodia's 61st anniversary of independence.

Like previous years, military officers, monks, students, Cambodian citizens, Government officials and foreign diplomats will participate in the ceremony presided over by the King Norodom Sihamoni at the Independence Monument. In the morning, the King will enter the Independence Monument, followed by Prime Minister Hun Sen, Assembly Members... to light the torch.

Cambodia was under French colonial rule for nearly a century. During 19th century, the Kingdom of Cambodia had been reduced to a vassal state of the Kingdom of Siam which had annexed its western provinces, including Siem Reap Angkor while growing influence from the Vietnamese Nguyen Dynasty threatened the eastern portion of the country.

On 11 August 1863, King Norodom signed a treaty acknowledging a French protectorate over his kingdom. The state gradually came under French colonial rule. Under the treaty, the Cambodian monarchy was allowed to remain, but power was largely vested in a resident general to be housed in Phnom Penh. France was also to be in charge of Cambodia's foreign and trade relations as well as provide military protection. Siam later recognized the protectorate after France ceded the Cambodian province of Battambang and recognized Thai control of Siem Reap Angkor.

The French Protectorate of Cambodia formed part of the French Colonial Empire in Southeast Asia. After the French establishment of a colony in Cochinchina (present-day southern Vietnam) in 1867, Pierre-Paul de La Grandière, colonial governor of Cochinchina, was carrying out plans to expand French rule over the whole of Vietnam and viewed Cambodia as a buffer between French possessions in Vietnam and Siam.

In 1896, France and the British Empire signed an accord recognizing each other's sphere of influence over Indochina, especially over Siam. Under this accord, Siam had to cede the province of Angkor back to the French-controlled Cambodia. The accord acknowledged French control over Vietnam (including the colony of Cochinchina and the protectorates of Annam and Tonkin), Cambodia, as well as Laos, which was added in 1893.
